

H3 | H3 direct

 2-5 tons [4,4k-11k lbs]

 max. 3 cm [1 inch]

Hydraulic Flail Mulchers for excavators from 2 to 5 tons

The lightweight H3 for mini excavators is ideal for maintaining hard-to-reach areas and works particularly productively despite requiring little hydraulic power - it mulches grass and brush up to 3 cm [1 inch] in diameter with ease.

The housing is made of wear-resistant steel, the adjustable support roller is reinforced, and the floating attachment is a standard configuration.

The **H3** mulcher is driven by V-belts, as is common with excavator attachments. With the **H3 direct**, the direct coupling of the motor to the rotor eliminates the risk of failure due to wear-related belt breakage under intensive continuous load, and work can be carried out without interruption.

Standard version and specifications

- > Mulches grass and brush up to 3 cm [1"] Ø
- > Excavator category 2-5 tons [4,400-11,000 lbs]
- > Chassis made of high tensile and wear-resistant steel AR400
- > Universal attachment interface
- > Float adapter
- > Transmission
H3: belt transmission with gear motor 11 cm³
H3 direct: direct rotor coupling, gear motor 11 cm³ PLUG & PLAY with DRAINLESS system
- > Front protection with chains
- > Rear protection with rubber flap
- > Adjustable support roller
- > Triple helical rotor with SMW flails

Optional configuration and accessories

- > Individual interface plate for an excavator arm
- > 190° rotation plate
- > Tools selection H3:
 - Y knives
 - Y knives on shackle
- > Motor selection H3:
 - Variable displacement motor VARIO FLOW 22-45 cm³
 - Gear motor 17 cm³

High-performance hydraulic drive

The **H3 direct** for excavators with a flow rate of 25-60 l/min is driven by a gear motor and is equipped with the **DRAINLESS** system as standard, which is ideal for small excavators without a leakage oil line or for companies with several mini-excavators in their fleet.

The drive system of the **H3** is designed for excavators with a flow rate of 20-130 l/min. For this mulching head, SEPPI M. offers various hydraulic motors with variable displacement as well as gear motors with flow control valve.

HYDRAULIC DRIVE	H3 direct
Pressure	100-250 bar [1,450-3,625 psi]
Return line pressure	max. 5 bar [72 psi]
Required hydraulic flow	25-60 l/min [6-16 gpm]
Required hydraulic lines: 2 (pressure, return)	

HYDRAULIC DRIVE	H3
Pressure	100-300 bar [1,450-4,350 psi]
Case drain pressure	max. 2 bar [22 psi]
Required hydraulic flow	20-130 l/min [5-34 gpm]
Required hydraulic lines: 3 (pressure, return, drain)
